

Appendix A

**The Notice of Commencement for the
Screening Study**

Notice of Commencement and Open House

Emerald Energy from Waste Inc. has initiated an Environmental Screening Process for a proposed redevelopment of its energy from waste facility located at 7656 Bramalea Road, in Brampton, Ontario. The proposed redevelopment may increase the annual processing capacity of the facility from 500 tonnes / day to up to 2,500 tonnes /day and the energy recovery from 10 MW to up to 100 MW. This redevelopment will enable Emerald to continue diverting non-hazardous waste produced by Ontario residents and businesses from landfill disposal and recovering energy for the community.

This project is subject to O. Reg. 101/07 under the *Environmental Assessment Act*. The proposed changes will involve additional facility infrastructure and a change to the Site footprint. This Environmental Screening will be conducted in accordance with the Ontario's "Guide to Environmental Assessment Requirements for Waste Management Projects". The results will be documented in an Environmental Screening Report, which will be available for review.

You are invited to attend the Public Open House to learn more and speak to the project team. Consultation events are planned throughout the environmental assessment process. Please register on the project website (www.emeraldefw.com) to be notified of these events.

Public Open House
December 6, 1:00 – 9:00 p.m.
Pearson Convention Centre
2638 Steeles Avenue East
